DifficultyBeginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \triangleright

1 Phases High-level steps your user needs to accomplish from start to finish	Create the user account	Outlook of restricted area	Showing alert notification if any one trespass into the containment zone	Precautionary measures should be taken while travelling
Steps etailed actions your user has to	Login	Tracking location	Looking for the safest area which is not under the containment zone	Getting updates of Covid-19 cases
3 Feelings What your user might be thinking and feeling at the moment	People will come to know the Covid-19 updates	They will be notified certainly if they enter the affected areas	People will kow the intense of the Covid-19	People can take the safest way during the journey
	Always the location to be	Pon't know whether there	Network is unstable at	People may not know whether the data is true
